Dr. Torry

My dear Sir

I received a letter some time since from you — All my plants have not arrived. As soon as they do you will be remembered. Dr. Parry will, he says, send to you, as soon as he comes across any. he has not sent to you

Could you send as soon as convenient a list of the plants collected by me in the Indian Territory As it is wanted in order to name, the set of the same in the department of Agriculture which now is only with numbers. If any notes were with the plants forward the same

Please inform me if you gave tubers of the wild potatoe to the Editor of the American Agriculturalist as in Oct. number it is figured saying a friend gave him the roots but does not credit the department

Yours
E. Palmer. M.D.

Dr Palmer has notice of several bones such from California & Salt Lake

You did not let me know your decision in reference to Dr Rehder

I add a line on Palmer's letter. I think you hardly have a list of Palmer Cherokee plants. If you have. It would be too much to ask you for a copy, unless you had a Secretary: & Curator: I can make out most of them. and if I get stuck can ask you for the names according to No. If you have however a list and can lend it to me I will see that it is returned. I have been busy over Berlandier's plants. most of them written but some nice things. I have some Manuscripts of his from the Smithsonian. Has anything ever been published of his collections. a personal history of seems he was 1st sent out by DeCandolle and I have a long statement of "Pacquets" of plants: sent him up to 1831. Did DC ever publish anything about them? Very busy still hope you are well and will enjoy the holydays

Yours

S C Parry
